Kinjal Shah

Software Engineering Leader | Scalable Systems | Team Growth |
Cloud | Security | FinTech
San Francisco Bay Area

Summary

Engineering leader with 20+ years of experience scaling high-impact teams and delivering robust, secure, cloud-native platforms. I've grown teams from 10 to 50+ globally distributed engineers, led product and platform development at scale, and helped organizations improve engineering velocity by 40% and reduce cloud spend. Passionate about team development, security-first engineering, and solving complex distributed systems challenges.

'm currently exploring new opportunities where I can help organizations scale teams + platforms, grow empowered teams, and build products that make a difference.

Experience

Rosendin
Independent Consultant
June 2024 - Present (1 year 4 months)

Agero, Inc.
5 years 7 months

Senior Director of Engineering
December 2019 - July 2024 (4 years 8 months)
